ECOSYSTEM

Health

The health pillar aims to provide accessible and affordable medical diagnosis and treatment through e-Health.

Governance

The governance pillar aims to create an e-governance platform to enable access to public services and entitlements.

Livelihood

The livelihood pillar aims to increase employment and income through e-commerce and e-investments.

Entertainment

The entertainment pillar aims to improve access to quality entertainment content and support creative community members.

AREAS OF WORK

Health

Provide tele-medicine services, maintain patient records, conduct diagnostic tests.

EDUCATION

Impact digital literacy, create a repository of learning & teaching e-content, provide online classes, connect students via Web.

LIVELIHOOD

Facilitate training for vocational and life skills, provide virtual career counselling and facilitate access to job opportunities.

GOVERNANCE

Share information on schemes and entitlements to empower citizens and create an e-government platform for improved information dissemination and transparency.

FINANCE

Enable access to digital banking tools, enable micro and small enterprises to access credit.

ENTERTAINMENT

Create a repository of recreational online resources, conduct audio-video content screening in the community.

MODEL

The concept of Spartan Smart Villages seeks to transform the traditional village into a 21st-century smart village.

Under Spartan, two under-developed hubs—hubs in Haryana and Assam in India—have been identified, and each linked to nine villages. While rural entrepreneurs at the hub centre provide primary services under the umbrella of e-health, e-government, e-literacy, e-commerce, e-entrepreneurship, rural entrepreneurs in the sparsely populated and less-developed areas of the village community are also provided with the same facilities.

Sustainable, smart villages can become a source of inspiration for a sustainable future, creating an eco-friendly and self-sufficient environment.
